Contact Email: mtregaskes@saffordusd.k12.az.us

School Site: Safford Middle School

Buildings: 1003 Building A

Description of Problem

Please include a detailed description of the issues, as well as a description of and a copy of any professional studies, citations or reports from government entities, recommended solutions, and any cost information or estimates. If additional space is needed, please attach.

Building 300 is a ___ classroom building that is served by a chilled water system with fan coil units in each zone. The District was in the process of replacing the antiquated chiller and upgrading building controls when it was discovered that ___ fan coil units and their associated piping serving this building are in need of immediate replacement. These FCU's are original units and are hidden behind newer units making them virtually inaccessible. There are no as-builts that show these units and the existing control drawings only show the newer FCU's. It appears that these older FCU's have not been serviced or repaired in all likelihood since they were new. There is little to no air flow, ventilation or tempered air from these FCU's. This creates severe comfort and air quality problems particularly during summer monsoon and winter cold snaps.

Project Category: HVAC

Are any of the above-described issues in buildings or part of buildings that are leased to another entity, including a district sponsored charter school? N

Available Funding

Available Funding Source	Amount
Current unencumbered building renewal fund balance (Fund 690):
